C3600 Key Seating Tool

Closing the handle of the tool retracts a cutter blade that nips a keyway in thin metal. A small, round file or guided drill is recommended for cutting keys in heavier metals. This tool can be used with both countersunk and regular holes.

Standard tools are for Nos. 4, 6, 8, 10, 1/4 thread sizes rivet-nuts. The part numbers, respectively, are Nos. C3600-4-FH/CNSK, C3600-6-FH/CNSK, C3600-8-FH/CNSK, C3600-10-FH/CNSK and C3600-25-FH/CNSK.

Each tool is not interchangeable between thread sizes; one tool is set up for a single thread size.

These tools will cut in up to 3/32 aluminum, 1/16 mild steel and 1/32 stainless steel.

Worn cutter blades may be purchased and replaced. Cutter blades for Nos 6, 8, 10 or 1/4 thread size is part number C3600-K-14. The cutter blade for a No. 4 thread size is part number C3600-K18-440.

Repair parts are not available on these tools, except for previously mentioned cutter blades.

Once tool reaches end of useful life, please call Cardinal Components to purchase a new tool.

For pricing on tool or cutter blades please email us at: sales@rivnut.com or call **800-236-3200**.
