

RIVNUT® Fastener/Tool Selection Guide

The following Fastener/Tool Selection Guide indicates the fastener and thread size capability of each Böllhoff tool. This chart covers products made from steel only. For assistance in selecting tools to install aluminum or stainless steel products please contact Böllhoff Inc. or our Authorized Distributor.

To use the guide please do the following:

- Locate the fastener type in the top row of the chart.
- Locate the tool you are interested in along the left hand column.
- Select the intersecting data block. Each block contains the range of thread sizes that the tool will install of that particular fastener type.
